PROFILE

A highly motivated and detail-oriented 23-year-old studying Computer and Electrical Engineering at Trinity College Dublin. Passionate about coding and mathematics, with strong teamwork and communication skills developed through competitive sports and collaborative work experiences.

EDUCATION

Trinity College Dublin (2025 - 2026)

- Computer and Electrical Engineering – 1st Average (72%)

Modules
Management for Engineers
Computer Vision
Digital Signal Processing
Deep Learning and its Applications
Research Methods

Trinity College Dublin (2024 - 2025)

- Computer and Electrical Engineering – 2:1 Average (63%)

Trinity College Dublin (2022 - 2024)

- General Engineering

Patrician Secondary School – 589 points

ACHEIVEMENTS

- Intermediate county Football medal 2024
- Regional Mathematics Finalist 2022
- Achieved a 1st grade in 4th year engineering
- Senior Hurling County finalist 2023
- Kildare fleadh Ceol 3rd place

ACADEMIC PROJECTS

- 1) Earth to Lunar Communications network

2) Gyroscopic Pong

INTERNSHIPS

Cadence Design Systems – CPG Intern

8-Month Internship

- Worked within the VMT Infra team as part of the CPG business unit
- Developed a UI for an existing function improving accessibility and usability
- Prototyped this form using C++ and QT, while working to ensure compatibility with the existing infrastructure
- Worked on refactoring core a software function, reducing the number of parameters to improve code clarity and maintainability
- Collaborated with a professional engineering team, gaining insight into the development and maintenance of complex software used in EDA.

Happystack – Engineering, Marketing, and Finance Intern

4-Month Internship

- Worked across engineering, marketing, and finance in a fast-paced startup environment.
- Used few shot prompting to write a python program that used OpenAI API key to analyse and organise Data
- Spearheaded a GEO (Generative Engine Optimization) research project, evaluating tools and platforms for potential adoption or investment.
- Aided in the testing and debugging of an automated audit program
- Improved infrastructure and pipeline productivity within the company.
- Assisted in pitching the Company's podcast to a startup newsletter, that ultimately ended in a partnership agreement.
